

The main title of the event, 'Webinar Workshops Predictive Formulation Sciences', is displayed in a bold, dark grey sans-serif font. The background features a hand typing on a laptop keyboard with glowing blue gears and light trails, and a large graphic of interlocking puzzle pieces in shades of blue and purple.

### Hansen Solubility Parameters (HSP)

- Predict and improve compatibility and stability
- Smart selection of ingredients
- Applicable to blends, solutions and dispersions

### Hydrophilic Lipophilic Difference (HLD)

- Predict and improve emulsion stability
- Efficient replacement of ingredients
- Applicable to emulsions

- **Cost per workshop:** € 300
- **Duration per workshop:** 4 hours
- **Webinar date:** to be scheduled

- Introduction to a **predictive formulation science** (HSP, HLD or both) & the required parameters
- How to **determine parameters** via software/app guided experimentations
- How to **apply the data** to **predictively tailor and improve properties** of formulations
- **Q&A session** with our experts: 10+ years boosting the industry!
